16:00 - 18:00	Preparation of the project "Feasibility for a European Wide Harmonised Object Oriented Data Model" under the umbrella of B4G (Partners who are interested in participate in this new project, please contact Andreas Littkopf (andreas.littkopf@uab.es) before the meeting).

All the participants are invited to a joint dinner.

GMES Land User Meeting

October 23rd

9:00 - 11:00	<p>Object Oriented Data Models: common denominator</p> <ul style="list-style-type: none"> • Núria Valcárcel y Guillermo Villa (IGN). <i>New concept on Land Cover Information System: first step OODM</i> • Óscar Gómez (EGMASA). <i>Urban Atlas vs Andalusian SIOSE 1:10.000</i> • Gebhard Banko (UBA-A). <i>Test of Object oriented data model in Slovenia and Austria on the basis of SIOSE experiences</i> • Klaus Komp (Eftas). <i>DeCOVER – a German approach to use interoperability potential between national object oriented land cover datasets</i> • Geoff Smith (CEH). <i>LCM2007 - the UK land cover map built on a national cartographic database</i> • Gerard Hazeu (Alterra). <i>LGN: Dutch National Land cover mapping with the use of different datasources</i> • Ana Sousa (EEA). <i>State of the art of Shared Environmental Information System (SEIS)</i>
11:00 - 11:30	Coffe break
11:30 - 13:00	<p>FEASIBILITY OF EUROPEAN COOPERATION IN HARMONISING LAND COVER DATA</p> <p>Introduction Andreas Busch (BKG) (10')</p> <p>Discussion (Chairman: Andreas Busch and Andreas Littkopf)</p>
13:00 - 14:30	Lunch
14:30 - 16:30	<p>Parallel sessions:</p> <p>A) Towards GMES standards for high geo-information quality Steffen Kuntz (InfoTerra D): interested users welcomed</p> <p>Content: <i>In GMES land projects significant effort was allocated to assure a transparent and reliable process on quality assurance means for GMES products and services. In the workshop the results of 3 service lines will be presented and discussed; i.e. (1) the European component of the GMES Land Monitoring Core Service (LMCS), (2) the Urban Atlas (the local component of the LMCS), and (3) possible validation methods for the CORINE 2006 change layer, as a model how to handle map updating based on change detection means. Goal is to achieve a common understanding on the quality assurance methodology chosen and to obtain recommendations for further improvements from the participants.</i></p> <p>B) Preparation of the OODM project under B4G (continuation)</p>
